Chatbot for Smart Fashion Recommender Application

- Develop skills for recommendation in IBM Watson Assistant and Build a chatbot with IBM Watson Assistant to recommend the fashion based on the taste of the users.
- Using chatbot we can manage user's choices and orders.
- The chatbot can give recommendations to the users based on their interests.
- It can promote the best deals and offers on that day.
- It will store the customer's details and orders in the database.
- The chatbot will send a notification to customers if the order is confirmed.
- Chatbots can also help in collecting customer feedback.
